LWDD L-2/L-2B \$600,000

Cherry Road Bridge \$750,000

L-2 Pump Station \$4,000,000

## PROJECT DESCRIPTIONS

### LWDD L-2 & L-2B Canal Expansions

The project is a coordinated effort with the County and LWDD to improve the canal cross sections to improve the stormwater storage capacity of the canals. Areas of impact will primarily benefit the properties within the L-2 and L-2B Sub Basins.

### Cherry Road Bridge

The expansion of the Cherry Road Bridge Crossing will provide needed relief for discharging the CRA's water runoff into the C-51 Canal. The expanded Cherry Road Bridge Crossing is one of the projects identified by the Stub Canal Task Force as critical for flood mitigation for the Westgate/Belvedere Homes CRA area and adjacent communities. The project was completed in July 2011.

### L-2 Pump Station

The project will provide drainage improvements for the Lakeside Mobile Home Park primarily by the installation of a stormwater pump on the L-2 Canal. The project was funded by FEMA and will also provide flood mitigation for approximately 400 acres of adjacent properties.
