

LWDD L-2 Canal Improvements

Project Funding and Cost

Sources

FEMA (HMGP)
OCR (CCRT)

Total **\$3,000,000**

PROJECT DESCRIPTION

In a joint effort between the **Westgate/Belvedere CRA**, **Palm Beach County**, and the **Lake Worth Drainage District (LWDD)**, a small segment of the **LWDD L-2 Canal** will be improved to provide additional stormwater storage capacity and more efficient stormwater conveyance throughout the low lying community, thereby, alleviating flooding for homes and streets within the drainage basin.

The project will also include limited pedestrian amenities and landscaping enhancements along the open space to the north of the Canal right-of-way. Pedestrian amenities will include lighted sidewalks connecting public, commercial and residential uses and where appropriate, benches, shaded elements, and focal points. This infrastructure project was envisioned in the **Westgate/Belvedere Homes Community Redevelopment Plan** to have a dual purpose: Flood mitigate and a community enhancement opportunity.

Construction is scheduled to commence early January 2012 and completed by the Summer of 2012.
